

## VANTANA 2019

VANTANA ONTOUR | VANTANA DE LUXE | VANTANA PREMIUM

**Hobby**  
BUILT FOR LIFE

## ALL GOOD THINGS COME IN THREES

The VANTANA van is available in three variants: as VANTANA ONTOUR, VANTANA DE LUXE and VANTANA PREMIUM. The compact design is what makes all of them so good. It makes our trio ideal both for travelling and everyday life. There's no skimping on comfort in the clever compact washroom either, even in such a small space. All three model ranges offer the same layouts. Choose between the K60 FT version with a double bed and the K65 ET version with two single beds at the back.

# PRIZED. TREASURED. BUILT FOR LIFE.

It all started with a groundbreaking idea: to make mobile holidays easier, more comfortable and more relaxing. As a result, Hobby laid the foundations for modern caravans and motorhomes over 50 years ago. This aim is what still drives us to this very day.

Our recipe for success is based on four ingredients: trendsetting inventions, innovative technology, modern design and genuine passion. These key foundations have made us the global leader in caravan construction.

Each new generation of vehicles is notable for its superb standard equipment, spacious design, quality and functionality – and each provides premium value at an exceptional price. It's really no wonder that Hobby became the most popular and best-selling caravan brand in Europe.

Hobby. Built for Life.

MODEL OVERVIEW 31

## VANTANA ONTOUR THE ENTRY LEVEL ONE

Even the competitively priced entry level model has everything you could possibly need to travel in luxury. With a kitchen unit, stainless steel sink, double-burner hob and a 70-litre compressor refrigerator, the kitchen is perfectly equipped for mobile chefs. Comfy cold foam mattresses promise a restful night's sleep. The entire body is finished with B6 high-performance insulation along with XPS foam to provide exceptional insulation.

## VANTANA DE LUXE THE ALL-ROUNDER

Could you do with a little bit more? A 130 hp engine, 16-inch alloy rims and the "HOBBYCOMPLETE" ALL-INCLUSIVE PACKAGE are just a few of the benefits of the VANTANA DE LUXE. The interior also features a 90-litre compressor refrigerator as standard. For its exterior design, you can choose between classic white and the special Metallic Silver paint finish. The bumper is also painted in your chosen colour.

## VANTANA PREMIUM THE LUXURY CLASS

Caters to your every wish, just like the VANTANA DE LUXE: a 130 hp engine, 16-inch alloy rims and the "HOBBYCOMPLETE" ALL-INCLUSIVE PACKAGE. The innovative controls for the 90-litre SlimLine refrigerator are unique – you can use the HobbyConnect app, even from afar. For the exterior design, choose between the standard white paint finish, or one of the optional colours, slate grey, metallic silver or black. The bumper is also painted in your chosen colour.

# BODY

## HIGHLY-EFFECTIVE HEAT INSULATION

The body of the VANTANA is insulated with B6 high-performance insulation and XPS foam. This not only stiffens the body and dampens road noise, but also keeps heat and cold out and provides a pleasant living environment.

## LED ENTRY LIGHT WITH INTEGRATED WATER DRAINAGE

The LED entry light ensures excellent visibility when entering or leaving the van. The integrated rain guard provides a specific place for rainwater to drain away. (Standard in UK spec)

## SEAMLESS LINK TO THE CAB

Everything on one level: the extra-wide threshold guarantees a smooth transition between the cab and living area.

## REMIS PLEATED BLACKOUT SYSTEM FOR FRONT AND SIDE CAB WINDOWS

The proven REMIS pleated blind system for the cab keeps out prying eyes and sunlight. (DE LUXE and PREMIUM)

## DRIVER AND PASSENGER SEATS WITH ARMRESTS (CAPTAIN'S CHAIR)

The height and angle-adjustable cab seats are upholstered in the living room fabric and come with armrests on both sides, sturdy swivel brackets and good side support. The fixed cushions on the bench seats are ergonomically designed for improved comfort.

## HIGH-QUALITY VENT WINDOWS

The tinted outside windows are made as part of a casting process. The higher material thickness makes them considerably more resistant against tension and deformities and ensures improved sound insulation. The new sealing system also provides long-lasting protection against the ingress of moisture.

## THULE ELITE BICYCLE RACK

Weighing just 10.5 kg when empty and with a loading capacity of 35 kg, the THULE rack is perfect for transporting two bikes. The advantage of it is also the fact that no holes need to be drilled to install it, and the rear doors can still be opened, even when bikes are mounted on the rack. (Available for ET layouts, Optional Extra)

## COMBI-CASSETTES WITH PLEATED BLINDS AND INSECT SCREENS

All windows in the living compartment are equipped with combi-cassette blinds to protect against sun and insects.

## STORAGE SPACE

### INTELLIGENT AND FLEXIBLE PARTITIONING OF THE REAR SECTION

Lots of space for holiday and sports equipment is provided in the variable storage area at the rear. Kite equipment? Mountain bike? No problem: the optional lashing lugs make sure that everything stays in its place.

### FLEXIBLE BED FRAME

The bed frame can be folded to the side to accommodate larger items and sports equipment. Your precious cargo can be held securely in place with tie down straps using the fitted anchor points.

### REAR-VENTILATED WALL UNITS WITH PLENTY OF STORAGE SPACE

The doors open up wide towards the ceiling, leaving plenty of headroom. Extra-sturdy hinges ensure a strong opening and locking force. (De Luxe and Premium) The optional LED strip lights on the wall units provide an extra-special touch. Air vents in the wall units in conjunction with the body insulation prevent damp spots and mildew.

### STRONG ANCHOR POINTS

Fixed anchor points for securing items when you are on the move.

### COMPARTMENT IN CAB ROOF

Practical and safe: the large compartment with a lockable flap provides additional storage space. (Premium)

# LIVING AREA

## MESH POCKET IN ENTRANCE AREA

Practical and easy to access: the mesh pocket in the kitchen is the ideal place for stowing your holiday reading quickly and easily. (Example)

## LED SWAN NECK LAMPS

The exclusive reading light provides bright light with minimal electricity consumption. It can be directed at specific areas, helping you to read a book or study the route for the next day. (Premium, 1 x seating area, 2 x sleeping area)

# SLEEPING AREA

## COMFY COLD FOAM MATTRESS

The cold-foam mattress provides home-from-home sleeping comfort. Seven different hardness zones ensure optimal adjustment to your body contours.

## BED EXTENSION

The single beds in the K65 ET can quickly be made into a large reclining surface using an additional cushion.

## CENTRAL LIGHT SWITCH IN THE SLEEPING AREA

Every VANTANA is fitted as standard with a handy touch switch for the interior lighting. (Example)

## COMPARTMENT IN THE FLOOR AREA

No space is left unused. A compartment in the floor pedestal ensures everything is stored in the correct spot.

## CARPET IN THE LIVING AREA

The optional carpeting lets you recreate the comfort of your living room at home. It consists of multiple elements specially tailored to fit the layout of your VANTANA, and can be easily removed for cleaning. (DE LUXE and PREMIUM)

## HARD WEARING, REMOVABLE DRIVERS CAB CARPET

The easy-care carpeting in the driver's cabin keeps your vehicle tidy. The durable design with a reinforced heel area and Hobby logo is custom-tailored to fit the vehicle.

## EXTRA BED IN THE SEATING AREA

Using an additional cushion, the seating area can be transformed into a bed for small guests. (Standard in UK spec)

# KITCHEN

## LED LIGHTING AND POWER SOCKETS IN THE KITCHEN

A continuous LED lighting strip above the cooker and sink ensures optimal illumination of the work surface. Another detail: the two 230 volt power sockets in the kitchen.

## SLIMLINE REFRIGERATOR\*

The new SlimLine refrigerator developed and patented by Hobby is discreetly hidden away behind the furniture finish and creates a completely new sense of space. Inside, the compressor refrigerator is divided up in an entirely ingenious way: there are spacious cooling compartments on the left and right, and there is room for a pull-out beverage compartment in the middle between the two doors. Conventional 1.0-litre drink bottles can be placed in here with ease. The quiet refrigerator features a night set-back and boost function and can be controlled using the TFT control panel and the "MyHobby" app. (PREMIUM)

\*Technical specifications for Hobby SlimLine refrigerator in accordance with Commission Regulation (EU) No 517/2017: tCO<sub>2</sub> eq=0.058t / GWP = 1430 / contains greenhouse gases / refrigerant R 134a

## PRACTICAL HOB/SINK COMBINATION WITH EXTRA WORKSPACE

The gas hob and sink are made from robust stainless steel and form a continuous unit for easier cleaning. The generous space between the two burners makes preparing meals easy, even with bigger pans. The hob comes with electric ignition, and the split safety glass cover can be used to provide additional workspace if required. (Depending on model)

## GENEROUS WORK SURFACE

The compact kitchen is an example of the VANTANA's intelligent use of space and provides you with plenty of room to prepare delicious meals.

## CONVENIENTLY-SIZED KITCHEN DRAWERS

The large, fully extendable drawers ensure a clear overview and easy access. The soft-close mechanism ensures smooth, quiet closure, and sturdy locks prevent accidental opening while in transit.

## BATHROOM

### SLIDING DOOR WITH WINDOW AND STORAGE SHELVES

Unobstructed view of the outside, plenty of light inside and an integrated, pleated blackout blind: the large window and the compartments in the sliding door are extremely practical.

### GENEROUS STORAGE FACILITIES

Both beautiful and practical: care products can be accommodated in the mirror cabinets, so that they're always within easy reach.

### COMPACT WASHROOM

The new compact washroom makes particularly effective use of the available space. The toilet can be rotated so that plenty of space can be created for showering.

### PULL-OUT SHOWER HEAD

The stylish multipurpose fitting can be used both as a tap and a shower head. The hose can be tucked away inside the tap to save space.

### PLEATED INSECT SCREEN FOR SLIDING DOOR

Open the door, close the insect screen: that's how you let the fresh air in, whilst keeping the insects out.

### FROST-PROTECTED FRESH WATER TANK

The easily accessible fresh water tank is frost-protected and installed securely in the vehicle's rear.

### VENT WINDOW WITH FROSTED GLASS EFFECT

The vent window provides natural light and optimal ventilation for the washrooms. Its frosted glass effect guarantees the desired amount of privacy.

### THETFORD ROTATING TOILET

The cassette toilet can be rotated by 90 degrees to ensure an optimal use of space.

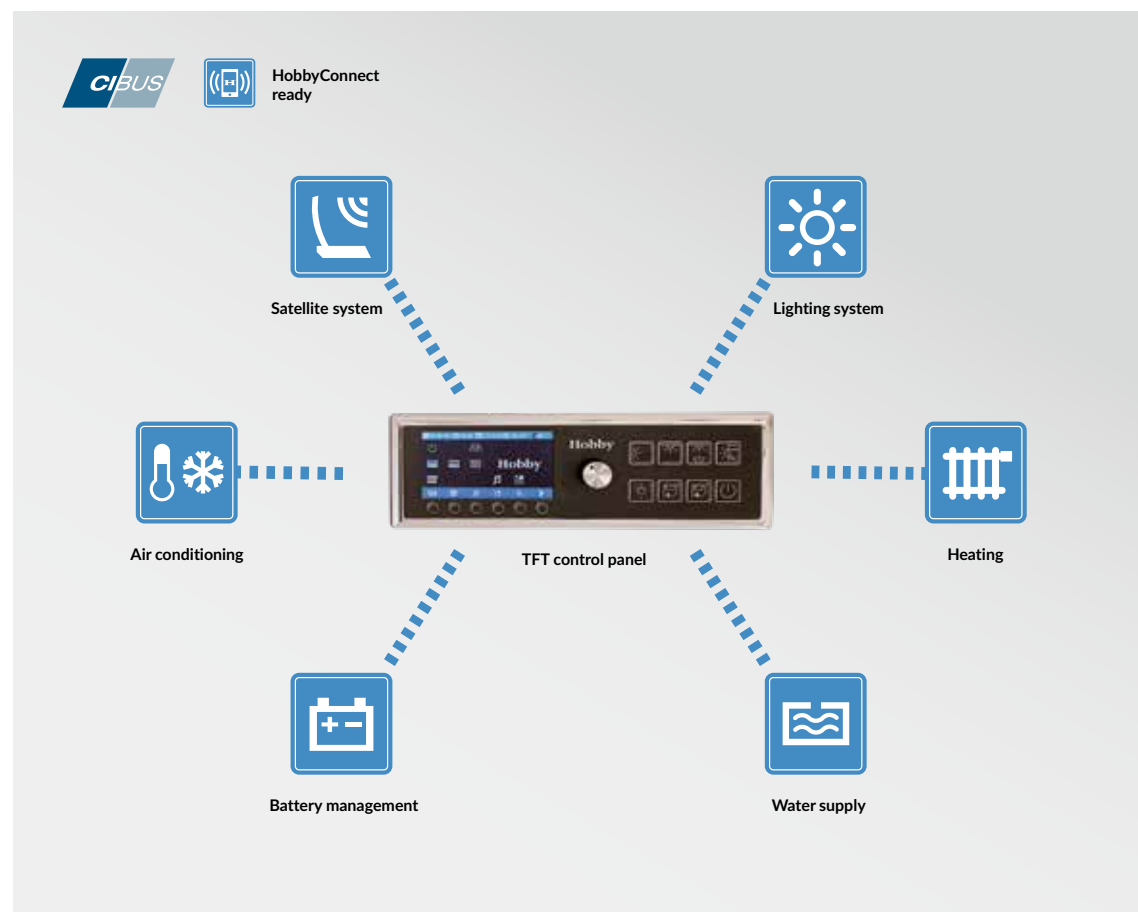

# ON-BOARD TECHNOLOGY

## HOBBY CI-BUS ON-BOARD MANAGEMENT SYSTEM WITH TFT CONTROL PANEL

The Hobby-designed CI-BUS on-board management system controls all devices and functions within the on-board network. The control button plus six additional softkeys under the display allow convenient and intuitive navigation between menus. Whether TRUMA, DOMETIC or other makes: thanks to the cross-sector interface, the new symbols and graphics on the Hobby TFT control panel represent a cross-section of all manufacturers' symbols. That way the user is presented with an already familiar symbolic environment and can read off data from the display, e.g. date/time, inside/outside temperature, water tank filling level and battery charge/discharge, or activate settings directly. Other BUS-capable on-board components such as heating and air conditioning can also be centrally controlled. The system is standardised and updateable, thus ensuring compatibility with next-generation devices. To date, up to 15 devices can already communicate with the control panel. (See manufacturer's instructions; standard in DE LUXE and PREMIUM)

## STATE-OF-THE-ART BATTERY MANAGEMENT

The intelligent battery sensor (IBS) supplies all the key data such as charging time, charging current and charging voltage, as well as the remaining running time and discharge current of the starter and body battery (GEL/AGM) in autonomous mode. All values can be read off from the TFT control panel. The battery sensor supplies the intelligent charger with the exact charging current and voltage it needs, thereby ensuring energy-efficient charging up to 100 percent capacity. With this system, charging times are reduced by approx. 30% by comparison with conventional chargers. (Standard in PREMIUM)

 HobbyConnect ready – More information on page 29.

## 230 V EXTERNAL SOCKET

The 230 V external power point means you can watch TV or use the electric grill outside when the weather's nice. (PREMIUM)

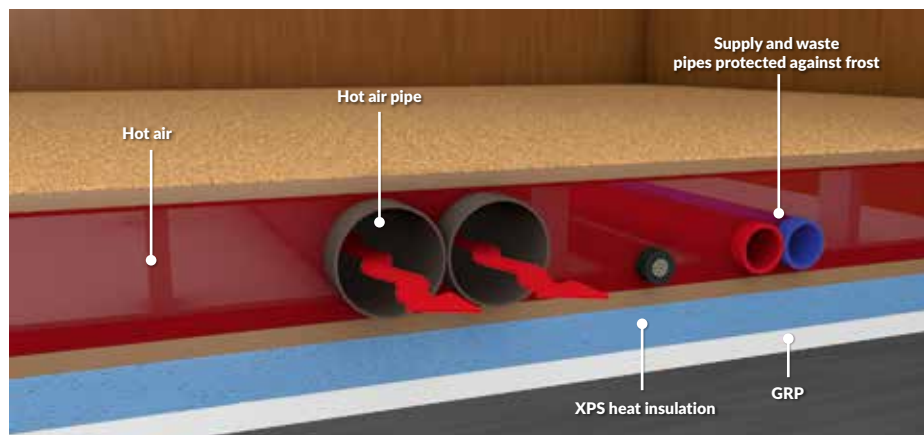

### TRUMA COMBINATION HOT AIR HEATING SYSTEM WITH HOT WATER BOILER

The hot air pipes of the TRUMA combi heater ensure an optimal distribution of heated air throughout the vehicle for a cosy temperature. It is controlled via the Hobby TFT control panel and also via the digital CP PLUS TRUMA control panel in the sleeping area. (Standard in all UK Models Standard in all UK Models)

### PREPARATION FOR ROOF-MOUNTED AIR CONDITIONING UNIT

Easy to retrofit. The necessary lines are already installed in the roof for retrofitting a roof-mounted air conditioning unit. (roof-mounted air conditioning unit not available from the factory)

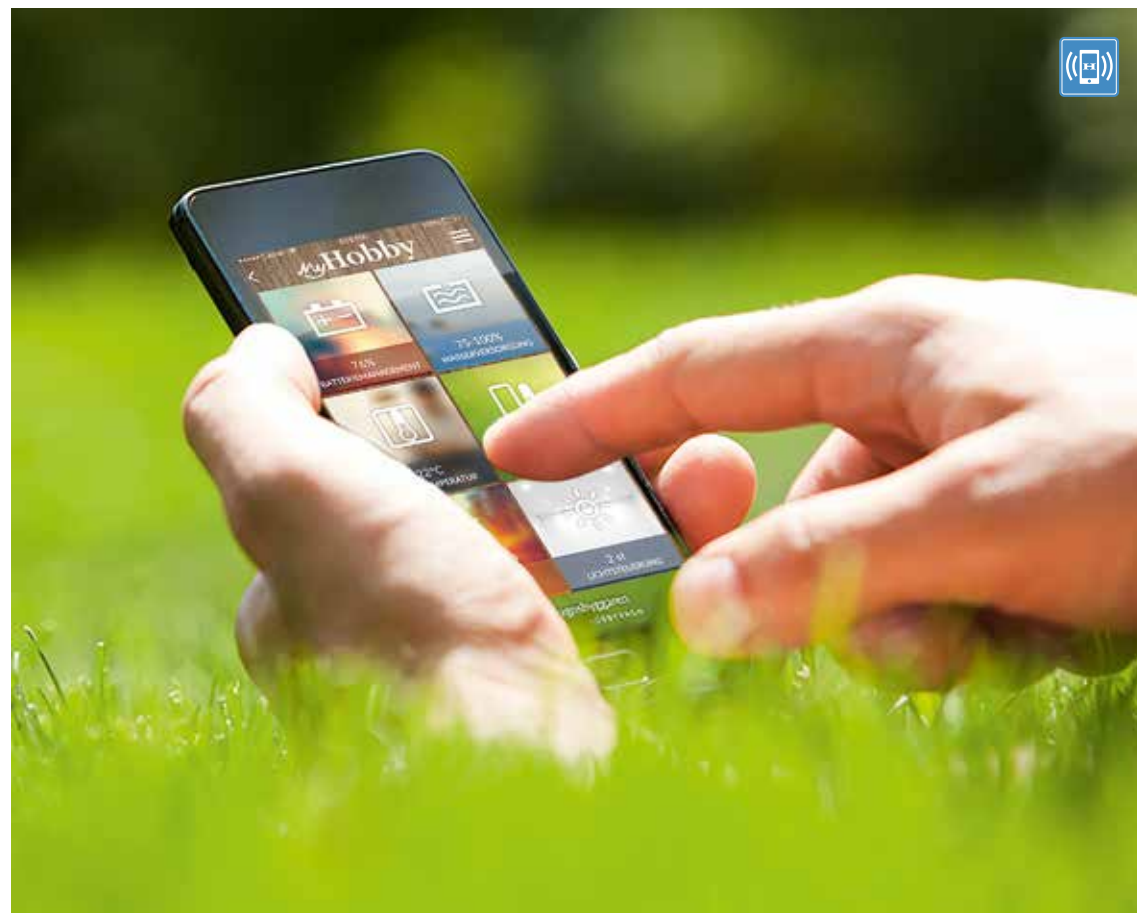

### FROST-PROTECTED INSTALLATION

The supply and waste pipes are housed in a heated double floor in the seating area. The complete internal floor comprises XPS heat insulation with GRP coating.

### HOBBYCONNECT/"MYHOBBY" APP

Developed exclusively for Hobby leisure vehicles, the HobbyConnect M2M system allows you to control all of the electronic on-board technology via mobile devices such as smartphones or tablets. For this you will need the "MyHobby" app, which can be used to check or directly activate settings such as time, temperatures, filling levels and battery charge. Other BUS-capable on-board components such as heating and air conditioning can also be centrally controlled.

HobbyConnect provides an interface between the van's CI-BUS on-board management system and the Internet. That means you can connect directly with virtually any location in the world from your own vehicle. Data communication takes place in both directions via a special web server. That way you can receive push notifications on the mobile device, e.g. if the vehicle is removed from its location in case of theft. (Standard in PREMIUM)

# ON-BOARD TECHNOLOGY

**PULL-OUT SHELF FOR FLAT SCREEN TV INCLUDING 12 V/230 V CONNECTIONS**  
 The TV arm, which can be pivoted through 180 degrees, allows a good view of the television from all positions. (Television not included in delivery), (PREMIUM)

## GENERAL INFORMATION

Vantana catalogue for the 2019 season  
Last updated June 2018

Some of the models featured in the brochure have optional extras or decorations that are not part of the standard scope of delivery. Deviations from the pictured furnishings in terms of structure and colour are excepted provided they relate to the nature of the materials used and are consistent with standard commercial practice. The same applies to technical modifications to the vehicle provided the overall product quality remains the same or is improved and the intended purpose is not impaired.
