

VANTANA 2020

ONTOUR | DE LUXE | PREMIUM

Hobby
BUILT FOR LIFE

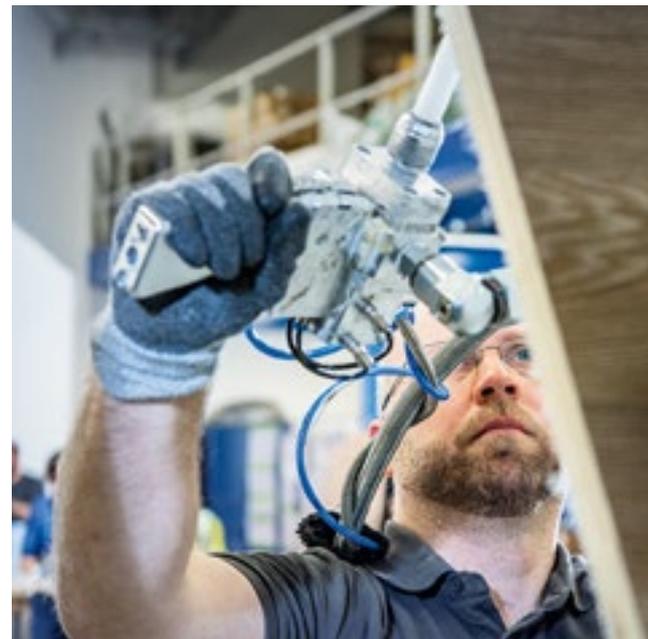

HOBBY. PRIZED. LOVED. BUILT FOR LIFE.

It all started with a groundbreaking idea: to make mobile holidays easier, more comfortable and more relaxing. As a result, Hobby laid the foundations for modern caravans and motorhomes over 50 years ago. This aim is what still drives us to this very day.

Our recipe for success is based on four ingredients: trendsetting inventions, innovative technology, modern design and genuine passion.

Each new generation of vehicles is also notable for its superb standard equipment, spacious design, quality and functionality – and each provides premium value at an extraordinary price. It's really no wonder that Hobby became the most popular and best-selling caravan brand in Europe.

Hobby. Built For Life

HOBBY VANTANA. ALL GOOD THINGS COME IN THREES.

The VANTANA van is available in three variants: as VANTANA ONTOUR, VANTANA DE LUXE and VANTANA PREMIUM. The compact design is what makes all of them so good. It makes our trio ideal both for travelling and everyday life. There's no skimping on comfort in the clever compact washroom either, even in such a small space. All three model ranges offer the same layouts. Choose between the K60 FT version with a double bed and the K65 ET version with two single beds at the rear.

MODEL OVERVIEW 31

VANTANA ONTOUR THE ENTRY-LEVEL ONE

Even the reasonably priced entry level model has everything you could possibly need to travel in luxury. With a kitchen unit, stainless steel sink, double-burner hob and a 70-litre compressor refrigerator, the kitchen is perfectly equipped for mobile chefs. Comfy cold foam mattresses promise a restful night's sleep. The entire body is finished with B6 high-performance insulation along with XPS foam to provide exceptional insulation.

K60 FT, UPHOLSTERY COMBINATION „ARRAS“

PRACTICAL 70L REFRIGERATOR

The compact refrigerator has an LED inside light and the interior can be divided up however you like. The additional compartment underneath the refrigerator provides space for all kinds of utensils and can be accessed quickly from outside.

VANTANA DE LUXE THE ALL-ROUNDER

Could you do with a little bit more? A 140 hp engine, 16-inch alloy rims and the “HobbyComplete” ALL-INCLUSIVE package are just a few of the benefits of the VANTANA DE LUXE. The interior also features a 90-litre compressor refrigerator as standard. For its exterior design, you can choose between classic white and the special Metallic Silver paint finish. The bumper is also painted in your chosen colour.

HOBBY
COMPLETE
ALL-INCLUSIVE

K60 FT, UPHOLSTERY COMBINATION „PATCH“

LARGE 90-LITRE REFRIGERATOR

Especially convenient – thanks to its double hinge, the large refrigerator can be opened towards either side. If you are sitting outside, you no longer need to get inside to take something from the fridge.

K60 FT

K60 FT

K60 FT

VANTANA PREMIUM THE LUXURY CLASS

Like the VANTANA DE LUXE, leaves nothing to be desired: a 140 hp engine, 16-inch alloy rims and the "HobbyComplete" ALL-INCLUSIVE package. The innovative SlimLine refrigerator is one of a kind and is integrated harmoniously into the wall units. For the exterior design, choose between the standard white lacquer finish, or either slate grey, metallic silver or black. The bumper is also finished in your chosen colour. The high-end equipment package is rounded off by the perfectly fitted framed windows.

K65 ET

**“HOBBY COMPLETE”
ALL-INCLUSIVE PACKAGE**

LIVING AREA

The availability of the following "HobbyComplete" ALL-INCLUSIVE package features depends on the model of vehicle, and in some cases these features are optional. Please refer to the current price list for details of the relevant features for individual models.

COMFORTABLE SEATING UNIT

The ergonomically adjustable driver's seat relieves the strain on your back during long journeys. Armrests on both sides and firm padding take the stress out of travelling. When you arrive at your destination, the chairs can be rotated by 180° in a matter of seconds. This transforms your cab into a cosy seating area for up to four people. The large table can be extended with ease via a fold-out table top and offers lots of legroom.

COMBINATION-CASSETTE WITH SUN AND INSECT PROTECTION

All side windows are equipped with combination-cassette pleated blinds to protect against sun and insects.

UPHOLSTERY COMBINATION VIGO

Optional extra for all models.

CARPET IN THE HABITATION AREA

The removable and easy-clean shag-pile carpet makes for a cosy interior and is tailored exactly to each layout.

LED SWAN NECK LAMP

The exclusive reading light provides bright light with minimal electricity consumption. It can be directed at specific areas, helping you to read a book or study the route for the next day.

STORAGE SPACE

INTELLIGENT PARTITIONING OF THE REAR SECTION

Lots of space for holiday and sports equipment is provided in the storage area at the rear. Kite equipment? Mountain bike? No problem: the optional lashing lugs make sure that everything stays in its place.

FLEXIBLE SLATTED FRAME

If the bed is moved to the side, the Vantana is also capable of storing large-size sports equipment. Fastening straps will keep everything in place during the journey. (Pictured here is the K60 FT)

REAR-VENTILATED CUPBOARDS WITH PLENTY OF STORAGE SPACE

Keep tabs on everything: The doors of the wall units can be opened up wide to allow you to keep tabs on what's inside. Robust hinges hold the doors in place, while a sturdy lock keeps your belongings secure when in transit. The LED strip lights on the wall units provide an extra-special touch (De Luxe and Premium). Air vents in the wall units in conjunction with the body insulation prevent damp spots and mildew.

STORAGE SPACE IN THE CAB ROOF

Practical and secure: the large compartment provides additional storage space. (Image shows Vantana Premium model)

COMPARTMENT IN THE FLOOR AREA

No space is left unused. A compartment in the floor pedestal ensures everything is stored in the correct spot.

MESH POCKET IN ENTRANCE AREA

Practical and easy to access: the mesh pocket in the kitchen is the ideal place for stowing your holiday reading quickly and easily.

STURDY FASTENINGS

Sturdy tie down eyelets, in which support straps can be fastened, ensure that loads are safely secured.

KITCHEN

LED LIGHTING AND POWER SOCKETS IN THE KITCHEN

A continuous LED lighting strip above the cooker and sink ensures optimal illumination of the work surface. Another detail: the two 230 volt power sockets in the kitchen.

SLIMLINE REFRIGERATOR*

The new SlimLine refrigerator developed and patented by Hobby is discreetly hidden away behind the furniture finish and creates a completely new sense of space. Inside, the compressor refrigerator is divided up in an entirely ingenious way: there are spacious cooling compartments on the left and right, and there is room for a pull-out beverage compartment in the middle between the two doors. Conventional 1.0-litre drink bottles can be placed in here with ease. The quiet refrigerator features a night set-back and boost function and can be controlled using the TFT control panel and the "MyHobby" app. (Premium)

*Technical specifications for Hobby SlimLine refrigerator in accordance with Commission Regulation (EU) No 517/2017: tCO2 eq=0.058t / GWP = 1430 / contains greenhouse gases / refrigerant R 134a

SLIDING DOOR WITH WINDOW AND STORAGE SHELVES

Unobstructed view of the outside, plenty of light inside and an integrated, pleated blackout blind: the large window and the compartments in the sliding door are extremely practical.

PRACTICAL HOB/SINK COMBINATION WITH MORE WORK SURFACE

The gas hob and sink are made from robust stainless steel and form a continuous unit for easier cleaning. The generous space between the two burners makes preparing meals a lot easier too, even with bigger pans. The hob comes with electric ignition, and the split safety glass cover can be used to provide additional workspace if required.

GENEROUS WORK SURFACE

The compact kitchen is an example of the Vantana's intelligent use of space and provides you with plenty of room to prepare delicious meals.

CONVENIENTLY-SIZED KITCHEN DRAWERS

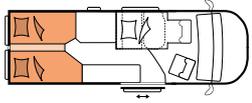

The large, fully extendable drawers ensure a clear overview and easy access, and sturdy locks prevent accidental opening while in transit.

PLEATED FLY SCREEN FOR SLIDING DOOR

Open the door, close the fly screen: that's how you let the fresh air in, whilst keeping the insects out.

SLEEPING AREA

K65 ET: SINGLE BEDS WITH BED EXTENSION

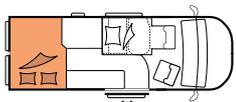

BERTH IN THE SEATING AREA

Using an additional cushion, the seating area is transformed into a bed for small guests in an instant.

K60 FT: DOUBLE BED, TRANSVERSE

CENTRAL LIGHT SWITCH IN THE SLEEPING AREA

Every Vantana is fitted as standard with a handy touch switch for the interior lighting.

INDIVIDUAL SLEEPING COMFORT

Tailor-made for you: combined with the slatted frame GOODSIDE®, the premium cold foam mattress moulds itself perfectly to the shape of your body. The system is supplied with fibreglass slats in three different firmness levels. What's more, they can be easily swapped to suit your personal preferences.

WASHROOM

COMPACT WASHROOM

The new compact washroom makes particularly effective use of the available space. The toilet can be rotated to create plenty of room for showering. The vent window provides natural light and optimal ventilation for the washroom. Its frosted glass effect guarantees the desired amount of privacy. And when the shower curtain is not being used, it can be kept behind the panel.

GENEROUS STORAGE FACILITIES

Both beautiful and practical: care products can be accommodated in the mirror cabinets, so that they're always within easy reach.

EXTENDABLE TAP FITTINGS

The multipurpose fitting can be used both as a tap and a shower head. The hose can be tucked away inside the tap to save space.

FROST-PROTECTED FRESH WATER TANK

The easily accessible fresh water tank is frost-protected and installed securely in the vehicle's rear.

THETFORD ROTATING TOILET

The rotating cassette toilet ensures optimal use of space. It features a powerful, quiet flush system. An intelligent display notifies you when the tank has to be emptied.

DESIGN

HIGHLY-EFFECTIVE HEAT INSULATION

The body of the Vantana is insulated with B6 high-performance insulation and XPS foam. This not only stiffens the body and dampens road noise, but also keeps heat and cold out and provides a pleasant living environment.

FRAMED WINDOWS

The high-quality, double-glazed and tinted framed windows are fitted flush with the exterior wall for a seamless look.

HIGH-QUALITY VENT WINDOWS

The tinted outside windows are made as part of a casting process. The higher material thickness makes them considerably more resistant against tension and deformities and ensures improved sound insulation. The new sealing system also provides long-lasting protection against the ingress of moisture.

WATER DRAINAGE VIA SLIDING DOOR

The integrated rain guard provides a specific place for rainwater to drain away. The LED entry light ensures excellent visibility when entering or leaving the van. (De Luxe and Premium)

BICYCLE RACK THULE FOR 2 BICYCLES

Weighing just 9.5 kg when empty and with a loading capacity of 35 kg, the THULE rack is perfect for transporting two bikes. The advantage of it is also the fact that no holes need to be drilled to install it, and the rear doors can still be opened, even when bikes are mounted on the rack. (Available as an option for ET layouts)

FLOOR MAT IN THE CAB

The easy-care floor mat in the driver's cabin keeps your vehicle tidy. The durable design with a reinforced heel area and Hobby logo is custom-tailored to fit the vehicle.

REMIS BLACKOUT SYSTEM FOR FRONT AND SIDE CAB WINDOWS

The proven pleated blind system REMIS for the cab keeps out prying eyes and sunlight. (De Luxe and Premium)

ON-BOARD TECHNOLOGY

HOBBY CI-BUS ON-BOARD MANAGEMENT SYSTEM WITH TFT CONTROL PANEL

The Hobby-designed CI-BUS on-board management system controls all the electronic devices and functions within the on-board network. The control button plus six additional softkeys under the display allow convenient and intuitive navigation between menus. The user can read off data from the display, e.g. date/time, inside/outside temperature, water tank filling level and battery charge/discharge, or activate settings directly.

Other BUS-capable on-board components, such as heating, air conditioning and the electric rooflight can also be centrally controlled. The system is standardised and updateable, thus ensuring compatibility with next-generation devices. To date, up to 15 devices can already communicate with the control panel.

 HobbyConnect ready

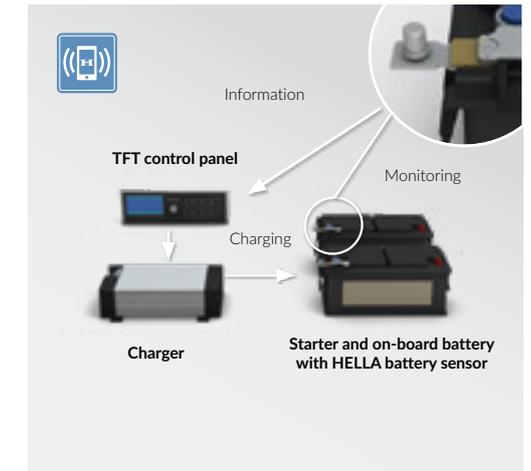

ON-BOARD CONTROL SYSTEM

The light control system with CI-BUS technology is located in the entrance area of all Ontour and De Luxe models. It controls almost all of the lighting units, displays the fill levels for the fresh and used water tanks, as well as the charge levels for the on-board and vehicle batteries, amongst other things.

EXTERNAL SOCKET 230 V, INCLUDING SATELLITE/TV CONNECTION

The 230 V external power point means you can watch TV or use the electric grill outside when the weather's nice.

STATE-OF-THE-ART BATTERY MANAGEMENT

The intelligent battery sensor (IBS) supplies all the key data such as charging time, charging current and charging voltage, as well as the remaining running time and discharge current of the starter and body battery (GEL/AGM) in autonomous mode. All values can be read off from the TFT control panel. The battery sensor supplies the intelligent charger with the exact charging current and voltage it needs, thereby ensuring energy-efficient charging up to 100 percent capacity. With this system, charging times are reduced by approx. 30% by comparison with conventional chargers. (Standard in Premium)

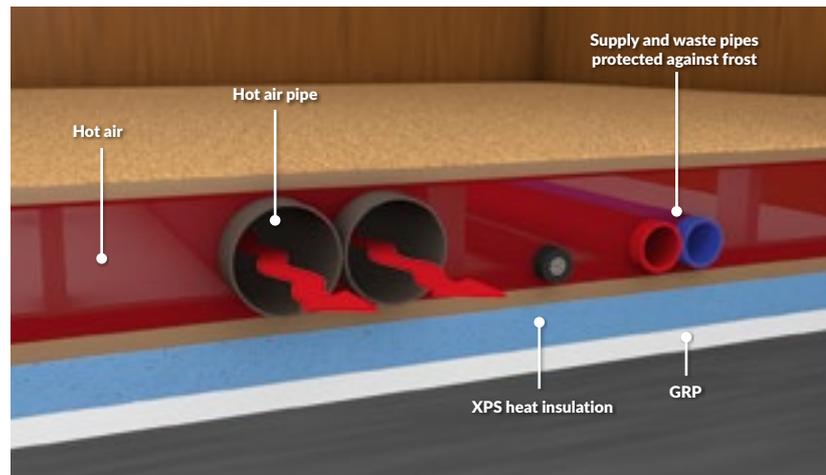

TRUMA COMBI 4 HEATING SYSTEM INCL. 10-LITRE HOT WATER SUPPLY SYSTEM AND FROST MONITOR VALVE

The hot air pipes of the combi heating system TRUMA ensure the optimal distribution of heated air throughout the vehicle for a cosy temperature.

PRE WIRING FOR ROOF-MOUNTED AIR CONDITIONING UNIT

Easy to retrofit. The necessary lines are already installed in the roof for retrofitting a roof-mounted air conditioning unit. (Roof-mounted air conditioning unit not available from the factory)

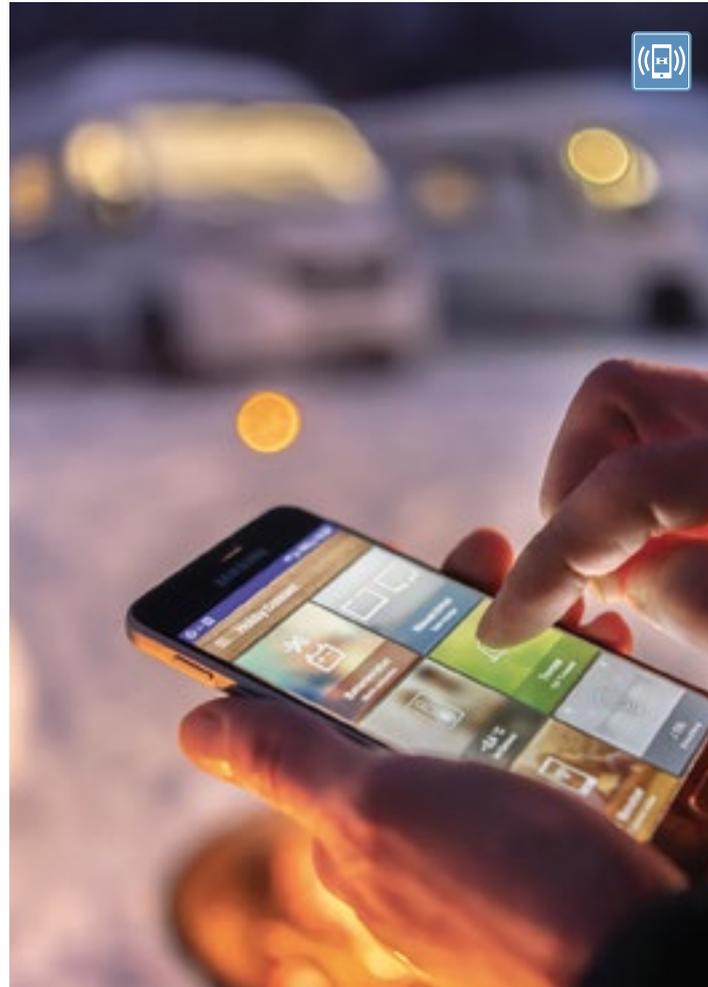

FROST-PROTECTED INSTALLATION

The fresh and waste water pipes are housed in a heated double floor in the seating area. The complete internal floor comprises XPS heat insulation with GRP coating.

HOBBYCONNECT

Turn on the air conditioning or heating when you're already on your way back from the beach – not a problem! The HobbyConnect on-board control system can be controlled via a smartphone or tablet using the free MyHobby app. The lighting, filling levels and battery charge can also be activated or checked using the app.

The HobbyConnect box can be ordered ex-works or retrofitted. Control all of the functions via WLAN or Bluetooth in the immediate vicinity of the vehicle. When further away, you can connect with the system using a SIM card.

PULL-OUT BRACKET FOR FLAT SCREEN TV INCLUDING 12 V/230 V CONNECTIONS

The TV arm can be swivelled through 180 degrees, allowing a good view of the screen from all positions. (Television not supplied)

NAVIGATION SYSTEM WITH DAB+, PITCH DATABASE AND REVERSING CAMERA

Besides functioning as a CD/DVD player, navigation system and display for the reversing camera, the AV tuner is used for wireless phone calls via Bluetooth and as a central media player including pitch-finder app.

Vantana catalogue, 2020 season
Last updated August 2019

Some of the models featured in the brochure have optional extras or decorations that are not part of the standard scope of delivery. Deviations from the pictured furnishings in terms of structure and colour are excepted provided they relate to the nature of the materials used and are consistent with standard commercial practice. The same applies to technical modifications to the vehicle provided the overall product quality remains the same or is improved and the intended purpose is not impaired.

Not all of the features are available for all models due to the layout design. Details of the equipment package can be found in the current price list. All content is correct at the time of going to press. Design and equipment package subject to change without notice; errors excepted. More images can be found at www.hobby-caravaning.de
